[7] Power - Connectors

DESIGN NOTE:
It's best to power the controller through the male connector to always have a female connector at the end of the chain.

DESIGN NOTE:
Do not hot-plug when powered!

DESIGN NOTE:
Do not exceed absolute maximum ratings! Maximum input voltage is 48V (13S).

LAYOUT NOTE:
Place TVS diodes near input power connectors.

LAYOUT NOTE:
Keep sufficient clearance between power nets according to IPC-2221/IEC60664-1
